Discovery Workshops

4 year olds

*Children must be 4 years old by June 1, 2014

Especially designed for 4 year-olds, these classes magically enforce creative play for appropriate childhood development in an environment that fosters creativity and promotes self-expression. Children discover and explore new topics presenting hands-on activities to excite and develop a young child's imagination through the arts, dramatic play, squishing, sorting, mixing, swirling, collecting or building.

Classes meet for three hours, twice a week on Monday/Wednesday or Tuesday/Thursday.
Please check class schedule for dates and times.

• A Box of Ideas •

The creative ideas are endless...if you give a child a box. Our curriculum expands the creative process using simple cardboard boxes to create safe havens and other useful and pretend objects for imaginative travel and play. Now embellish that with a flashlight, a few blankets and sheets, and the journey is like "Neverland."

• A Circus Life for Me •

Make a clown hat, while delighting in clown face painting with a professional clown and discover how to make different balloon sculptures. Eat popcorn while creating and embellishing art activities naturally found under the "Big Top."

• Crazy About Critters •

Filled with stories, games, crafts and special guest presenters sharing their furry, feathered and scaly animal friends, this class builds self-confidence and fulfills the natural curious nature of children while discovering some of nature's "crazy critters."

• Crazy Art •

Be amazed at the "crazy" sculptures that can result from combining everyday found objects. Young artists create unusual art sculptures and mobiles combining artistic materials with found objects. Things can get a little "crazy" during the tactile experience of combining various art mediums.

• Insects, Dinosaurs and Mammals •

Filled with crafts and hands-on activities, young paleontologists become familiar with many different dinosaurs and other strange and exotic prehistoric creatures. Discover various facts about "a bug's life" while building an insect house and discover how mammals are like you and me.

• Kitchen Chemistry •

Hands-on activities invite children to discover and formulate cause and effect relationships with familiar objects. Become a mad mixer and turn some well-known and some not very well-known substances together to make slime or bubbly concoctions to gather facts about volcanoes and other related topics.

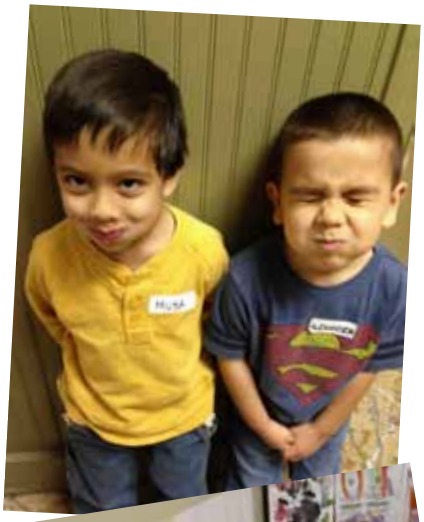
• Lego® Frenzy •

Little engineers design, build and create with various beginner and advanced Lego® kits while learning the basic principles of construction and engineering and building critical thinking skills.

4 year olds

• Princess and Pirate Play •

Focusing on swashbuckling creative and imaginative play, pirates make hats, masks and necklaces, while painting and embellishing cardboard box pirate ships. Princesses make wands, embellish wings and imagine life as a princess painting and embellishing a cardboard box castle, all while following a map to buried treasure. Of course, we know there are girl pirates and that pirates can use magic wands to help find the "loot." Aarrgh!!!



• Puppet Palooza •

Puppets have long been used as a tool for children to express their feelings and describe circumstances. Children apply different art mediums, using literature, to explore basic puppet design. Join us to discover a world where making assorted puppets is always a journey in creativity.

• Stamp Your Art Out •

Experimenting with different handmade stamps, young artists discover the versatility of this medium and delight in the process of stamping by printing t-shirts, cards and wall hangings.

• Super Heroes Adventure •

Superheroes have captivated the imaginations of children for many years. Young super heroes will decorate their own capes and masks, play familiar games to discover interesting facts about well-known super-heroes and make special "super power" snacks.

• To Infinity and Beyond •

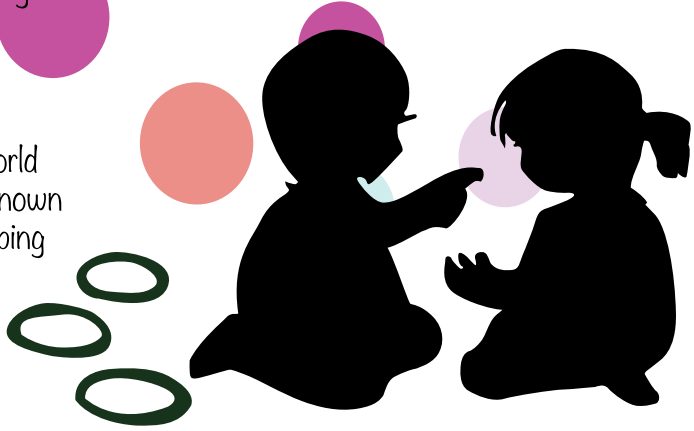
Become an amateur astronomer while pretending to travel to the depths of the universe, discovering exciting facts about our solar system and creating your own space vest and other space creations.

• Wheels, Wings and Whistles •

In this on-the-go class, we will be pushing, floating and tooting our whistles exploring planes, trains and automobiles while designing our own method of transportation.

• Young at Art •

Experience an age-appropriate art-making journey into the world of color, shapes and textures through the lives of some well-known artists. Children experiment with various mediums while developing an awareness of art in everyday life.



Creative Workshops

5&6 and 7&8 year olds

•Art Around the World•

Young artists combine fun and the creativity of art with the mysteries of history, the lure of geography and the diversity of various cultures of the world. This journey is one with an interactive hands-on approach of various different countries focusing on the use of different art mediums and experiences. Children's best discoveries of global awareness are made when experiences are tactile and meaningful in their everyday life.

•A Taste of Texas•

What is so special about Texas? Well, everything, since nearly everything is bigger in Texas. Experience the music and food, while discovering interesting trivia about our unique state and explore the history that defines our rich culture all presented with hands-on creative projects and visits from special guests. Bring an appetite for the tasty barbeque, ya'll.

•Construction Wizardry•

Build beyond the imagination, while discovering the basics of engineering, construction design,teamwork and building structures to test the strength and practicality of architect's designs with new and recycled materials. Young architects can create buildings from milk cartons, water towers from food storage containers or bridges from cereal boxes and use plastic bags to create cities, habitats on another planet or whatever else their imagination presents.

•Crazy About Cultures•

Every day this workshop provides hands-on interactive activities to reflect an imaginary journey through one country or continent while discovering various facts about foods, clothing, art and languages. Children really enjoy the introduction to different food reflective of the particular culture brought in for that particular workshop.

•Discovering Great Artists•

Explore the styles and techniques of some of the world's greatest artists. Each art process focuses on one style and one artist. A brief biography and portrait of each artist assists children by inspiring them and adding depth to their own art. Artistic projects create opportunities for children to expand the creative experience and to "learn" by "doing."

•Got Science•

Children love science because it catches their attention and engages their curiosity. But it does not have to just sizzle to create curiosity and intense moments of observation. Our diverse curriculum explores some physical and chemical properties of different elements, compounds and mixtures as well as venturing into topics like force and motion, constructing and launching small rockets, hands-on "critter" investigations and observations, building kaleidoscopes to discover light refraction and more. Different areas of science from natural sciences to social sciences are explored each time the class is offered so that those attending do not get a repeat class but an introduction to a whole new experience. Brace yourselves as we inspire exploration and discovery.

5&6 and 7&8 year olds

• Taste, Create & Go! •

Through storytelling, healthy, but artistic, snack making without touching a stove, art activities, music and movement, children discover how to make positive choices in the areas that most affect health. Get your body moving and work up an appetite while experiencing interactive ways to create a healthier lifestyle. Expect special guests. Bring an appetite and join the fun!

• LEGO® Frenzy Meets "Righteous" Robotiks •

Using creative thinking and problem solving abilities, children design and build models with LEGO® pieces and kits to satisfy a specific purpose while exploring basic construction concepts, simple machines and how gears work. Young engineers progress to WeDo™, designed for the early elementary learner, to introduce boys and girls to the early principles of robotics. Children build LEGO® models featuring working motors and sensors, then program their robot models to write stories, solve problems or create innovative projects. Curriculum is designed to develop skills in science, simple technology, engineering and mathematics. Robotiks is remarkable!!!!

• Mask Mania •

The art of making masks has been traced back to ancient times in Greece, medieval theatrical performances, tribal rituals from various continents and other cultural influences. They have also been used as a method of separating economic stature among inhabitants. This dynamic workshop presents a celebration of different cultures using different mediums to entice children's participation in the creation and embellishment of his/her own mask while discovering facts about different cultures and pastimes.

• Paper Antics •

Journey through the art of creating and embellishing various paper projects and experience the process of making paper from used and discarded paper products. This is a delightful exploration of the endless possibilities of how old and new paper or little and big paper can be used to create other "art" pieces such as origami, paper maché, jewelry and more.

• Shakin' It Up With Shakespeare •

This highly energized, informal, but structured, workshop promotes self-expression, critical thinking, creativity and teamwork. An introduction to Shakespeare presents young thespians with the opportunity to explore basic aspects of acting, movement and character development as well as a brief encounter in the interpretation of the language of Shakespeare. Class work includes basic theatre games to develop the ability to tell stories collaboratively and work in the moment, acting out chosen scenes from age-appropriate Shakespeare plays while building character development, strengthening reading and vocabulary and collaborating on the use and making of minimal stage props and/or costumes.

• ARTRAGEOUS Workshop •

The young artist with a serious love for art will journey through our metropolis of art. This curriculum draws from all of our art classes and combines various mediums, such as paper maché, clay building, and painting with assorted mediums or extended drawing. Children encounter introductions to great artists, art around the world, and reflections of historical movements such as the peace, love and rock 'n roll movements of the 60's to create "artful" experiences through a variety of mediums focusing on the process of art to explore new art ideas and techniques.

Robotics

7-10 year olds

E.A.R.L.Y. ROBOTICS
(Engineering and Robotics Learned Young)

Created by NASA, E.A.R.L.Y. Robotics is a program exposing 7-10 year-olds to engineering while developing a strong understanding of the basic fundamentals of building and mechanical principles. Building robots and realistic motorized models from LEGO® kits in a team-building atmosphere, teams select pilots to operate the robot using basic on/off switches, and to manipulate through given obstacles and challenges to help complete the mission. Student engineers gear up for a friendly competition on the final day.

Advanced E.A.R.L.Y. Robotics

Designed for the students who have previous E.A.R.L.Y. Robotics experience from other qualified programs and/or have participated in E.A.R.L.Y. competitions, this program challenges students to work more quickly through the curriculum and take strategies to the next level. The curriculum will encompass more design and more challenging missions.

LEGO® Frenzy Meets "Righteous" Robotiks

Using creative thinking and problem solving abilities, children design and build models with LEGO® pieces and kits to satisfy a specific purpose while exploring basic construction concepts, simple machines and how gears work. Young engineers progress to WeDo™, designed for the early elementary learner, to introduce boys and girls to the early principles of robotics. Children build LEGO®models featuring working motors and sensors, then program their robot models to write stories, solve problems or create innovative projects. Curriculum is designed to develop skills in science, simple technology, engineering and mathematics. Robotiks is remarkable!!!!

Did you know?

The museum provides all students with a healthy snack each day.
We also offer a short time of movement between classes to get the students' "wiggles" out.

LET'S MOVE!

good to grow!

we ♥ robotics!

celebrate with us!

Friday, July 11th

Join us as we celebrate our fourth year anniversary at this location! Live music, face painting, magic shows, art projects & lots of cake!

Lunch Bunch

LUNCH BUNCH is offered for those children who (1) are signed up for both morning and afternoon classes; (2) attend morning classes but cannot be picked up at noon; or (3) attend afternoon classes but need to be dropped off before 1:00. Children are to bring a sack lunch and a drink. A staff member will assemble the children and escort them to a classroom where they will eat lunch and play quiet games, watch a short video, listen to a story, etc. Those who are attending an afternoon class will be escorted to that teacher; those who are leaving the museum will be released to the parent upon sign-out.

$15 per week or $5 per day.

Remember when visiting to check out our daily activities!

Frequently Asked Questions

Q: Is the museum a non-profit organization?
Yes! The Woodlands Children's Museum is a registered 501(c)3 non-profit organization. Donations are tax deductible to the extent allowed by law.

Q: How do you accommodate my child's needs?
In order for us to be able to help your child have an enjoyable experience with us, we ask that you notify us **at the time of registration** of any allergies, accessibility concerns, behavioral, psychological, emotional conditions or other special needs. Failure to inform the Museum of any conditions can result in the child's dismissal from the program. The Museum reserves the right to determine the compatibility of your child's needs within the program. The Museum is NOT responsible for administering medication to children. Please consult your pediatrician about altering the child's dosage so that medication can be administered outside of our program.

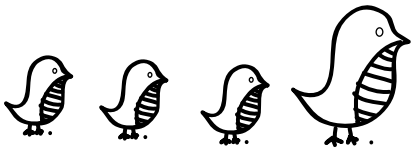
Q: What are the qualifications of your teachers and assistants?
All of our teachers are certified and/or professionals in their field.

Q: How are children supervised?
Parents or guardians are required to physically bring their child(ren) into the Museum's atrium. Children are supervised at all times and escorted on bathroom breaks. The Museum reserves the right to remove a child from class if his/her behavior interferes with the curriculum.

Q: May parents stay in the classroom?
Our programs promote independent learning and socialization. If you feel that your child is unable to remain in class without you for more than a few minutes, we suggest waiting a year before sending him/her to our programs. Parents are required to sign out their child(ren) at the end of class.

Q: Who can I contact during the day if I need to leave a message concerning my child?
Please call The Woodlands Children's Museum at 281-465-0955, and a staff person will deliver your message.

Q: How should my child dress for the classes?
The best choice is comfortable clothes that may get messy, closed-toe shoes and a sweater, as the classrooms can get cool. Please do not allow your child to wear shoes with rollers.



Registration

- One registration form per child.
- Registration forms with incomplete or inaccurate information cannot be processed.
- Always select an alternate class in the event your first choice is not available.
- Fax registration forms to 281-465-0956

Cancellations, Exchanges and Refunds

- Each registration **with payment** is considered a confirmed registration.
- Registrations are not transferable from one child to another.
- Please be advised that The Woodlands Children's Museum reserves the right to cancel classes in the event our classes do not meet a minimum enrollment. Patrons will receive a full refund. We appreciate your understanding.
- Patrons who desire or need to cancel a registration will receive a 50% refund of the cost if notification is received at least 5 working days before class begins.
- There are no refunds for registration cancelled or dropped less than 5 working days before class begins.
- To receive a 50% refund, patrons must notify The Woodlands Children's Museum in writing (fax, mail or e-mail) or in person at The Woodlands Children's Museum no less than five working days prior to the first day of class.

Questions or Concerns

Contact us at 281-465-0955
Monday through Friday
from 9:00 am to 4:00 pm or
museum@woodlandschildrensmuseum.org

We believe that in the life of a young child it is the process that is more important than the product. The process of experimenting with various materials, the exploration of different techniques and the discovery of how it all comes together nurtures positive self-esteem and self-confidence while providing a more well-rounded experience.

Museum Program Registration

Print and mail completed registration form to:
The Woodlands Children's Museum
P.O. Box 130864
The Woodlands, TX 77393

Release and Consent

Although TWCM hopes that no student is ever injured or hurt, injuries are a possibility of participation in the Class. The risk of injury is a risk that the student and legal guardian(s) voluntarily agree to assume in exchange for the privilege of registering for and participating in the Class. The student and their guardian(s) understand and agree that this risk is not a risk that TWCM assumes and that TWCM is not responsible for any injuries to the students. Accordingly, _____ (the "guardian"), the legal guardian of_____ _____(the "student") voluntarily releases TWCM and their directors, officers, employees, volunteers, agents and all persons acting by, through, under or in concert with TWCM (collectively, the "Released parties") from any and all losses, demands, claims, suits, causes of action, liability, costs, expenses and judgments whether arising in equity, at common law, or by statute, under the law contract, torts, or property, for personal injury (including without limitation emotional distress), arising in favor of the guardian or the student based upon, in connection with , relation to or arising out of, directly or indirectly, the student's participation in the Class (collectively, "claims") AND EVEN IF ANY SUCH CLAIMS ARE DUE TO RELEASED PARTIES' OWN NEGLIGENCE, STRICT LIABILITY WITHOUT REGARD TO FAULT, VIOLATION OF STATUTE OR OTHER FAULT. The guardian and student hereby give their permission to the Released Parties to obtain emergency medical treatment for the student if the Released Party deems in its discretion that such emergency medical treatment is necessary. The student and the guardian acknowledge and agree that any photos, videos or pictorial images including those of student taken or created by Released Party (including without limitation any taken by any photographer or videographer paid by or volunteering to the Released Party) during or relating to the Class are the sole property of TWCM and may be used in further publications or promotions, advertisments and exhibits of TWCM (or any other person authorized to use such images by TWCM) without the need of any additional permission form or consideration to the student or guardian.

ASSOCIATION OF CHILDREN'S MUSEUMS

Visit, stay and play! The Woodlands Children's Museum is ideal for children under 7 years old. They can walk around and explore the open exhibits specially designed for them; The Museum provides hands-on play experiences and daily interactive activities at 11 a.m. Admission fee is valid all day. Conveniently located in a shopping center, the museum is surrounded by different places to have a meal and come back to play.

MUSEUM HOURS: MON-SAT: 10AM-5PM
SUN: NOON - 5PM

ADMISSION: $5 per person (Adults and Children)
Children under 2 are FREE.
Members are FREE.

Come see us soon & be part of our growing community!
